**Subject:** Final version of the Bridgeton Brush Fire Response Report

I believe it's time to think about getting this document posted to the West Lake Landfill webpage.

Just as a reminder, this report describes the response that EPA conducted immediately following a grass fire that occurred on the West Lake Landfill complex but not on OU-1, Area 1 or Area 2. This report includes the results of the soil samples collected on or near the burned area.

One additional note, this document will be part of the administrative record for the Surface Fire Mitigation removal action which was signed about 2 weeks ago.

Let me know if there are any questions.

Tom Mahler
